Prime Plus Technical Trading Course: Master Advanced Technical Analysis & Professional Trading

Introduction

The stock market rewards traders who have the right knowledge, discipline, and strategy. While many beginners rely on tips or emotions, successful traders use technical analysis, price action, and proper risk management to make informed decisions.

If you're looking to move beyond the basics and become a confident trader, the **Prime Plus Technical Trading Course** from **TradeBox Capital** is designed to help you develop professional trading skills through live market training, practical sessions, and expert mentorship.

What Is the Prime Plus Technical Trading Course?

The Prime Plus Technical Trading Course is an advanced stock market training program created for traders who want to improve their technical analysis skills and build profitable trading strategies.

The course combines:

- Advanced technical analysis
- Price action trading
- Candlestick pattern mastery
- Trend analysis
- Risk management
- Live market sessions
- Strategy building
- Trading psychology

Unlike theory-only courses, students learn using real market examples and live chart analysis.

Who Should Join This Course?

This course is ideal for:

- Beginners with basic stock market knowledge
- Intermediate traders
- Intraday traders
- Swing traders
- Working professionals
- College students
- Investors who want technical analysis skills

Course Highlights

Students receive:

- 35+ Live Interactive Sessions
- Live + Recorded Classes
- Lifetime Access to Recordings
- Premium Trading Tools
- Expert Mentorship
- Community Support
- BSE Certified Course
- English & Tamil Learning

Why Learn Technical Analysis?

Technical analysis helps traders understand market behaviour using price movements, chart patterns, and indicators instead of guessing market direction.

Benefits include:

- Better entry and exit timing
- Higher probability trade setups
- Reduced emotional trading

- Improved market confidence
- Consistent decision-making
- Better risk control

Topics Covered in the Course

1. Advanced Candlestick Patterns

Students learn:

- Doji
- Hammer
- Marubozu
- Shooting Star
- Engulfing Pattern
- Harami
- Three Line Strike
- Abandoned Baby
- Kicking Pattern

They also learn how to identify false signals using volume confirmation.

2. Reversal Pattern Mastery

This module focuses on identifying market reversals before major price movements.

Topics include:

- Head & Shoulders
- Inverse Head & Shoulders
- Double Top
- Double Bottom
- Diamond Pattern
- Island Reversal
- Fake Breakouts

3. Trend Analysis & Price Structure

Understand market trends through:

- Trendlines
- Support & Resistance
- Market Structure
- Swing Highs
- Swing Lows
- Moving Averages
- Trend Phases

Students also learn when trends are likely to continue or reverse.

4. Wedge & Triangle Patterns

Master popular breakout formations including:

- Rising Wedge
- Falling Wedge
- Ascending Triangle
- Descending Triangle
- Symmetrical Triangle
- Broadening Formation

These patterns help traders identify high-probability breakout opportunities.

5. Continuation Patterns

Students learn continuation setups such as:

- Flags
- Pennants
- Rectangles
- Cup & Handle
- Rounding Bottom
- Rounding Top

These patterns help traders trade with the existing market trend.

6. Strategy Building

One of the most valuable sections of the course teaches students how to combine multiple concepts into one trading system.

Topics include:

- Entry Planning
- Exit Strategy
- Stop Loss Placement
- Take Profit Planning
- Trade Management
- Backtesting
- Live Market Practice

7. Money Management

Successful trading isn't only about finding winning trades.

Students learn:

- Position Sizing
- Capital Allocation
- Risk-Reward Ratio (RRR)
- Drawdown Control
- Portfolio Protection
- Trade Discipline

8. Trading Psychology

Emotions often cause traders to lose money.

The course explains:

- Fear & Greed
- Emotional Discipline
- Overtrading
- Patience

- Market Psychology
- Decision Making
- Avoiding Panic Selling

Practical Learning Experience

TradeBox Capital focuses on practical education instead of theoretical concepts.

Students receive:

- Live Chart Analysis
- Real Market Examples
- Weekly Practice Sessions
- Expert Guidance
- Trading Assignments
- Market Case Studies

This practical approach helps learners apply concepts in real market conditions.

Benefits of Joining Prime Plus

By completing this course, students can:

- Read charts confidently
- Identify profitable trading opportunities
- Reduce unnecessary losses
- Build consistent trading strategies
- Improve market confidence
- Understand advanced technical analysis
